- As-needed housekeeping and maintenance
- Three meals each day

### Mind & Memory Care Personal Service Plans

Personal service plans vary from individual to individual and are based on a healthcare review performed by our associates to determine what personal assistance or medical care is requested or required. The healthcare review is performed prior to moving in and at regular intervals after move-in.

#### Mind & Memory Care

For residents whose care needs consist primarily of cueing and reminders and who require little or no physical assistance with activities of daily living. Residents are appropriate for our plan if they generally exhibit mild cognitive impairment and no or limited behaviors that would require substantial increases in staff time, such as aggression or resistance to care.

#### Mind & Memory Care I

For residents whose care needs consist primarily of a minimal level of physical assistance with activities of daily living and who generally exhibit a minimal level of cognitive impairment. These residents may also display one or more behaviors, such as aggression or resistance to care, that would call for additional staff time and attention.

#### Mind & Memory Care II

For residents whose care needs require a moderate amount of physical assistance with several activities of daily living and who generally exhibit moderate cognitive impairment and/or associated behaviors.

#### Mind & Memory Care III

For residents whose care needs require a substantial amount of physical assistance with several activities of daily living and who generally exhibit severe cognitive impairment and/or associated behaviors. Residents requiring the assistance of two community associates for transfers on an ongoing basis would be on Level III or higher.

#### Mind & Memory Care IV

For residents who have extensive needs, such as a need for total care with one or more activities of daily living or a substantial amount of assistance warranted on a daily basis. A resident using a mechanical or electric lift on an ongoing basis for transfers would be on Level IV at a minimum.

#### Mind & Memory Care V

For residents who need total assistance with all aspects of care, including assistance with dining. They may also require extensive emotional/behavioral support.
